

**Webfigure 2**

Kaplan – Meier plot of patient survival. The numbers below the x-axis show the patients at risk at two years intervals. The p-value was derived from a log-rank test.

Patients at risk, AZA :				
190	90	65	39	10
Patients at risk, MMF :				
1029	692	421	181	46
