

Supplementary table 3 Linear regression using molecular biomarkers in combination with clinical parameters to predict creatinine values one year after engraftment.

| | parameter estimate | p-value | adj R ² |
|-------------------|--------------------|---------------|--------------------|
| intercept | 0.321 | 0.0336 | |
| NLRP2 | 0.058 | 0.2226 | |
| RGS5 | 0.133 | 0.0041 | |
| IGJ | 0.054 | 0.0224 | |
| PRA (%) | 0.006 | 0.0221 | |
| BCAR | 0.030 | 0.7585 | |
| per HLA-MM | 0.028 | 0.2674 | |
| total | | 0.0003 | 0.3127 |
