

**Table S3b** Correlation of urinary electrolyte concentration with phosphate in the urine. Correlation coefficients (corr) of calcium, magnesium, sodium, chloride and potassium (Var) to phosphate (phos) in the Urine. Only calcium showed a somewhat stronger correlation with urinary phosphate excretion.

<b>Parameter</b>	<b>estimate Mean (Var)</b>	<b>estimate Mean (Phos)</b>	<b>partial corr</b>	<b>repeated measures corr</b>	<b>overall corr</b>
Calcium	0.8312	11.9963	0.43092	0.78812	0.68137
Magnesium	4.4622	12.4281	0.29622	0.35792	0.52572
Sodium	15.9049	12.4935	0.03887	0.22421	0.37141
Chloride	32.9183	12.3557	0.12278	0.47265	0.40074
Potassium	50.8180	12.4281	0.22331	0.35944	0.10918
