

Bernhard Grubmüller

Medical University of Vienna, Austria

Bernhard Grubmüller, MD, PhD, is an urologist at the Medical University of Vienna. His main research field is Uro-Oncology specialized on prostate cancer and molecular imaging with positron emission tomography. Dr. Grubmüller actively runs two prospective studies on cytoreductive radical prostatectomy (clinicaltrials.gov ID: NCT02971358) and salvage lymph node dissection in prostate cancer (clinicaltrials.gov ID: NCT02974075). Additionally he is involved in a prospective drug trial on ⁶⁸Ga PSMA 11 (clinicaltrials.gov ID: NCT02659527). His talk will summarize the current literature for the usage of PSMA-PET in different stages of the disease.
