

## **Firas Abdollah, MD**

*Henry Ford Hospital; Detroit, Michigan, USA*

Dr. Firas Abdollah is an Urologist at the Vattikuti Urology Institute at Henry Ford Hospital and the Director of VCore. Dr. Abdollah received his medical training from Baghdad University, College of Medicine, Baghdad, Iraq. He completed a 5-year residency in Urology at the University Vita-Salute San-Raffaele Hospital in Milan, Italy and also completed an additional 4 years of a clinical and research fellowship at Henry Ford Hospital. Dr. Abdollah specializes in robotic surgery for prostate cancer offering several technique alternatives, including the Retzius-sparing technique, which is associated with better urination control recovery after surgery as compared to the conventional technique. Dr. Abdollah also specializes in robotic surgery for kidney cancer, adrenal tumors and bladder cancer, as well as surgical management of testicular and penile cancers.

Dr. Abdollah is an extremely prolific researcher, with almost 300 published peer-reviewed articles, hundreds of abstracts, and several book chapters. His studies focus mainly on prostate cancer, kidney cancer, and bladder cancer. Besides oncology, Dr. Abdollah has studied several health care issues, such as racial disparity in urological care. Several of Dr. Abdollah articles are included in the national and international guidelines.
