

**Melanie Hassler-Di Fratta**

*Medical University of Vienna, Austria*

Dr. Hassler-Di Fratta graduated in chemistry and molecular biology from the University of Vienna and completed her PhD in molecular pathology at the Clinical Institute of Pathology of the MUV in 2014. After graduating in medicine, she started a residency in Urology in 2017. Her current research focuses on genetic and epigenetic mechanism in genitourinary diseases. In one of her projects, which is funded by the EAU Research Foundation Seeding Grant, she is investigating molecular subtype profiles of bladder cancer patients treated at the MUV.
