

Table 2

Representation of the differentially expressed genes comparing the groups I_GFR (calculated GFR < 45ml/min/1.73 m²) and h_GFR (calculated GFR ≥ 45ml/min/1.73 m²). Genes are categorized based on gene ontology terms and PANTHER classifications and are ranked by difference of mean expression between the two groups under study. Values represent ratios of sample to standard reference expression on a log2 scale.
