

Dear Colleagues,

it is our pleasure to invite you to the 12th Annual European Pediatric Colorectal and Pelvic Reconstruction Congress with a special interest in urology in anorectal malformations, incontinence and urogenital reconstruction in collaboration with the European Pediatric Surgical Association (EUPSA), the ESPU (European Society for Paediatric Urology) and Pediatric Surgery Postgraduate Seminars (PESPOS).

Anorectal malformations and Hirschsprung's disease are complex issues. We have invited an international faculty of world experts to share their knowledge and experience with us. Beside the management of ARM and Hirschsprung's this year we will also focus on the urological sequelae of those conditions, i.e. urogenital reconstruction, management of incontinence and associated urogenital problems.

Vienna in December is a lovely place with a stunning winter atmosphere and vibrating cultural possibilities.

We are looking so much forward to welcoming you in Vienna.

We will keep you updated with the program.
Carlos Reck
Alexander Springer

In collaboration with:

European Society of Paediatric Urology

Pediatric Surgery Postgraduate Seminars

This event will be approved by the Austrian Medical Chamber with 26 DFP-Points.

Please be aware that photographs and/or video footage will be taken at the event. These may be used for the purpose of documenting or reporting the event and published in print and online media, on various social media platforms and on MedUni Vienna's website.
