Success by imaging: How to lift my research to the next level

The 4th MIC Festival “Success by imaging: How to lift my research to the next level” combines imaging expertise in technology and application and targets scientists from various disciplines. The event will be initiated by a keynote lecture, followed by scientific presentations of the nodes. A “Multi-Cluster Round Table” discussion will bring together representatives from all MedUni Vienna clusters. A highlight lecture will present “How biomedical image informatics can support multi-modal imaging across scales” for driving research forward. Finally, all MIC nodes invite you to participate in the poster session, displaying the latest achievements in medical imaging research. The Festival will be held as an “in-person” event with live streaming.

Programme highlights

- Keynote lecture by Niki Popper
(Simulation Researcher, TU Vienna)
- “Multi-Cluster Round Table”
- Highlight lecture by Katja Bühler
(VRVis – centre for visual computing)
- Thematic poster tours and poster awards
- Rapid-fire pitch and poster presentation

Scientific committee

Wolfgang J. Weninger (speaker), Pascal Baltzer,
Marcus Hacker, Georg Langs, Rupert Lanzenberger,
Cecile Philippe, Ursula Schmidt-Erfurth,
Tatjana Traub-Weidinger

Organization and contact

Claudia Kuntner-Hannes, Wolfgang Birkfellner,
Roxane Licandro, Ursula Schmidt-Erfurth,
Wolfgang Wadsak, Ute Weber-Woisetschläger
