

Seminar on Pediatric Cardiac Auscultation

July 12-14, 2016

Dear students,

*I am pleased to announce this seminar which will be held by Professor Ioannis Germanakis,
Pediatric Cardiology Faculty of Medicine University of Crete GR*

*Aim of the course: To provide a multimedia based teaching course in
pediatric cardiac auscultation for medical students with*

- a) small group interactive teaching*
- b) "virtual" evaluation of pediatric cardiology cases, by using high
quality reproduction of digital phonocardiograms,
of findings in congenital heart disease and of innocent murmurs*

*A baseline test to document the participants' knowledge and a final test to test their improvement
following the course will be included, also as quality control of the teaching approach.*

*The seminar will hopefully help participants to become masters in
pediatric cardiac auscultation, it is however also important that students will enjoy the course (quote Prof. Germanakis) 😊*

Teaching hours: 5 per day

8.30- 10.00; 10.30-12.00; 12.15-13.00

Teaching venue: to be determined

Number of participants: 20 students

Registration: via MedCampus (SS 2016, Nr.: 781.005)

*This 2016- seminar has again been made possible by the longstanding cooperation between the University of Crete, Iraklion and the Medical University of
Vienna.*

A certificate in Greek will also be given to the students.

I warmly recommend you to participate in this summer seminar and to learn from our Greek colleague!

Ulrike Salzer-Muhar
