

## Checklist for Students and Teachers

### Masks – FFP2

Masks must be worn from the time of entering the building until the time of leaving the building.

Masks must also be worn during lectures/examinations (with exceptions).

Masks must also be worn outdoors on university premises where a distance of two metres is not maintained (e.g. entrances, assembly points, ...).

### Access regulations

Anyone infected with SARS-CoV-2 (regardless of whether they have symptoms or not) is not allowed to take part in lectures/examinations.

This applies to all, teachers and students alike.

### Proof of low epidemiological risk

Controls may be carried out - following prior notification:

- Vaccinated 3 times (= basic immunisation)
- and/or negative PCR test < 48 h.

Without proof, no participation in the course and immediate departure from the course room.

Exception: If vaccination is not possible due to pregnancy or danger to life or health, this must be proven with the medical vaccination exclusion certificate provided by MedUni Vienna - in this case a negative PCR test < 48 h is required.

Attention: for the clinical area, observe the regulations valid there.

Make sure you receive the 4th vaccination (= booster) in time!

### Airing the rooms

Observe the airing guideline - do not forget to air regularly!

All safety and hygiene measures apply also to all lecturers, students and persons on site during teaching.

For detailed regulations on the organisation of courses and examinations in the winter semester 2022/23, please refer to the published regulations, published in the 45<sup>th</sup> bulletin, no. 69 of 23.9.2022.
