

Ethics Declaration¹

We declare that the enclosed thesis reports on original research, does represent an accurate account of the experiments that were performed, and contains an objective and balanced discussion.

The thesis holds sufficient detail and references to permit others to replicate the work.

We are prepared to provide the original raw data and confirm that we will retain the original data according to the rules of the Good Scientific Practice Guide of the Medical University of Vienna.

We know that fraudulent or knowingly inaccurate statements constitute unethical behaviour and are unacceptable.

The doctoral candidate ensures that he/she has written original work, and if he/she has used the work and/or words of others, this has been appropriately cited or quoted.

The content of the thesis has not been and will not be used as a whole or in parts for submitting another thesis.

If the work involved chemicals, procedures or equipment that have any unusual hazards inherent in their use, we have clearly identified these in the thesis.

All procedures were performed in compliance with relevant laws and institutional guidelines and the appropriate institutional committees have approved them. Written informed consent was obtained for experimentation with human subjects, under the approval of the relevant ethics commission.

All financial or other substantive conflict of interests that might be construed to influence the results or interpretation of the thesis is disclosed. All sources of financial support for the project are disclosed.
